BENCH PRESS OPTIONS FOR LIGHT ASSEMBLY WORK

P/N BP-1000U
with upgrade package

Our mid-size 'C' frame press with two models and output to 2 tons, 4" stroke, and mounting plate with three sets of tapped holes. Measures 18" x 10" x 26".

P/N BP-500

Our smallest footprint air press with output to 800 psi, adjustable column, 3" stroke and keyway for easy tool mounting. Measures 9" x 10" x 16".

P/N 5000L

Our largest 'C' frame press with four models and output to 4 tons. 4" stroke, 12' x 13" bed area with mounting holes, speed control, filter/regulator, counter and front mounted air gauge are standard. Measures 21" x 13.5" x 28".

ElectroPress, a servo driven press for critical assembly applications that require programming of depth in microns, speed in mm/sec, load sensor and dwell timing in very small increments. Pressure ranges from 100 kgf to 5000 kgf.
