UNIX LASER SOLDERING "FAB" SHEET		
Features	Advantages	Benefits
1. CCD camera built into the laser head	1.1 Makes programming much easier and more accurate	1.1 Save money and save time with simple changeover
2. Custom shapes for more precise spot of heat e.g. oval, doughnut, triangle, square, rectangle, etc.	2.1 Heat transfer is reduced to surrounding components	2.1 Less risk to damage nearby components
3. Spot size to 0.2mm versus 0.4mm for competition	3.1 Tighter area for soldering of smaller components and less heat transfer to other areas	3.1 More accurate; less chance of damaging nearby components
4. Clear glass over standard lens	4.1 Reduces risk of damaging expensive laser lens	4.1 Saves money and lens life
5. Average mean time of 20,000 hours of life	5.1 Reduces cost of ownership	5.1 Better ROI
6. Special feeder to handle 0.15mm solder versus 0.3mm for competition	6.1 Solder smaller parts	6.1 More flexibility
7. Laser built by UNIX and integrated; competition buys and resells	7.1 Better support and newer technologies and features	7.1 Better value for your money
